

# **It Works! Set of 2 Fresh Stain Remover with Applicator**

Thank you for purchasing our unique stain remover. You will be astounded at how effectively IT WORKS removes stains from a variety of textiles and surfaces. Please read the instructions below carefully to ensure that you use the paste in the most economical and effective way possible.

**THIS PRODUCT WORKS BEST ON “FRESH” STAINS THAT HAVE NOT YET BEEN WASHED OR TREATED.**

**USE: *It Works*** for clothing stains, carpets, upholstery, car seats, head liners, all types of over garments, leather, vinyl, aluminum rims, jewelry, and lots more.

## **IMPORTANT**

### **Color Fast Test**

Please always do a “patch test” on an unobtrusive area to test for color fastness. (See below)

**Stain removal - blood and rust**, wine, beer, fruit, fat, oil, cocoa, chocolate, resin, grass, ink (no document ink) and many other stains are easily removed. Just put some ***It Works*** onto a white dampened cloth and work it into the stain.

**Note:** While this solvent removes some stains in seconds, for other stains allow the solution to penetrate a few minutes or to repeat the treatment.

If a stain becomes brighter, it generally can be removed completely. After the stain is removed, rinse the material out thoroughly. Sensitive fabrics, such as velvet, silk, leather etc., and textiles, which cannot be rinsed out (jackets, suites, etc.), should be treated with distilled water only, since lime deposits found in some tap water can cause stains.

## **IMPORTANT**

## **Color Fast Test**

***It Works*** is not only a stain remover but a bleaching solvent that can dye stains as well!

That is why solid colored textiles like coats, carpets, upholstery, curtains, etc., must be tested for color fastness on a hidden area (hem, inner seam, patches, and so on). Please ensure that the test area is chosen, so that the outer part of the fabric does not become wet.

Apply ***It Works*** onto a cloth dampened with hot water, carefully pat onto test area. Let it stand for five minutes, rinse with water, and then blot dry. If there is no color change it is safe to continue with the stain removal. Linings should be removed before the treatment, since these are rarely colorfast.

## **Already washed stains**

Some stains that have already been washed may only be removed at the same temperature they were already treated.

When washed at 90°, ironed, or after chemical treatment at the cleaners, stains can be removed in the following way:

- Moisten stain, apply ***It Works***, and gently rub into the stain. Instead of water, use steam (either from your steam iron or water kettle). Steam the stained area until the stain is resolved.

Since some textiles are not colorfast when steam is applied, test fabric for color fastness before treatment.

**Note:** Old stains are harder to remove than new stains. The treatment can be repeated several times without harming the fabric. Some old stain may *not* disappear.

## **Carpets and Upholstery**

### **IMPORTANT**

#### **Color Fast Test**

Please always do a "patch test" on an unobtrusive area to test for color fastness.

Clean large areas such as carpets, upholstery, car seats, auto head liners, etc., with a solution of 10 cm or 3.9 inch ***It Works paste*** and ½ liter or 16.9 liquid oz of hot water and a brush (scrubber) or sponge. Then dry with an old terry cloth, so that the loose dirt will be removed.

For intense stained or soiled rugs, apply some ***It Works*** directly onto a moist sponge and gently rub onto the soiled areas.

For stains caused by solid substances, like tar, feces, resin, shoe polish etc., scrape the loose dirt from the area with a spoon after the wet cleaning procedure.

**Blood** should only be cleaned with cold water.

USE OUR **HELP** E-MAIL FOR QUESTIONS OR QUERIES: [\*\*\*questions@it-works.ca\*\*\*](mailto:questions@it-works.ca)

**Rust** is best removed as follows. Use lemon juice instead of water for moistening the stain. After the cleaning procedure with ***It Works***, rinse the fabric thoroughly.

**Rust** stains on ceramic tiles or on smooth surfaces are best removed by saturating a cotton ball with a combination of lemon juice and ***It Works***, then put it onto the stained area and let sit, so that the solvent can penetrate the stain.

**Whitener, Dye Stain Removal:**

## **IMPORTANT**

### **Color Fast Test**

Please always do a "patch test" on an unobtrusive area to test for color fastness.

***It Works*** cleans all of your laundry, curtains, etc. made of natural and synthetic fibers spotlessly white. Use 100 grams or 3.5 oz ***It Works*** paste dissolved in 20 liters or 5.2 gallons of hot water. This is sufficient for 5 kilos or 11 lbs of laundry. Add 20 cm or 7.8 inches from the tube in addition to your soap detergent. **Note:** do not put

the paste into the detergent compartment. Either apply ***It Works*** directly or dissolved in water, then pour directly onto laundry.

### **Jewelry and Precious Metals**

Gold, 925 Sterling Silver, etc. will look new again. Dissolve 5 to 10 cm or 1.95 inches to 3.9 inches ***It Works*** paste in 1 liter or 33.8 liquid oz of hot water. Place jewelry or metal parts into the solution and let stand for about 5 minutes. Then dry with a soft cloth.

Small pieces can be cleaned by applying ***It Works*** directly.

### **Cleaning Vinyl and Small Surfaces**

For all smooth surfaces, such as vinyl window frames, parquet floors, laminate, aluminum rims, car lacquer, etc., apply ***It Works*** directly, without water, and pat or rub with a sponge or cloth. Then continue treatment with water, and blot the area dry with a cloth. This way you can also remove stubborn dirt and stains such as tar, pollen, fly specks, moss stains, and other difficult to clean stains.

USE OUR **HELP** E-MAIL FOR QUESTIONS OR QUERIES: [questions@it-works.ca](mailto:questions@it-works.ca)

### **Cleaning Leather:**

**A colorfast test is necessary for all leathers.** For cleaning or removing stains, dissolve ***It Works*** in warm distilled water. Tap water contains lime, and destroys the leather fibers.

***It Work*** does not dry out; it can be stored for years provided the tube is securely closed after each use. ***It Works*** is a chemical agent and must be stored away from children.

**Caution: The paste should not be accessible to children.**

Note: This paste may not be swallowed. The paste should not be exposed to eyes (when contact occurs, rinse thoroughly with cold water and consult a physician). When using the paste, be sure to use only in airy, well ventilated areas.
